TRANSITION

Transitions into preschool and from preschool into elementary school are important milestones for children and their families. Like other major changes, these transitions can cause children and families to experience many strong emotions such as excitement, anxiety, fear, and/or hope. To lessen the stress for all of those concerned, including teachers, it is important to prepare children and families for the upcoming changes. Strong transition efforts targeting parent involvement can lead to positive teacher morale, parent support and satisfaction, a great reputation for the program in the community, and improved child outcomes.

Valuable principles and recommendations to guide the development of a transition process have been proposed by the National Center for Early Development and Learning Kindergarten Transition Project. In *Enhancing the Transition to Kindergarten: Linking Children, Families and Schools* (Pianta and Kraft-Sayre, 2000), the authors propose adopting the following principles for successful transitions:

- Foster relationships as resources
- Promote continuity from preschool to kindergarten
- Focus on family strengths
- Tailor practices to individual needs
- Form collaborative relationships

Great Start Readiness Programs (GSRP) create and implement plans that transition families both into and out of the program. The GSRP transition plan should be an extension of a unique, community-wide effort. An effective transition planning committee has representatives from all early childhood stakeholder groups including parents, the Intermediate School District (ISD) early childhood contact, Formula and Competitive GSRP, Head Start, Center- and Home-Based early care and education providers, Early On®, special education, kindergarten teachers, elementary/public school academy administrators, the local Great Start Collaborative, and a representative from the local Great Start Regional Resource Center. The languages and cultures of the community should also be reflected in the team membership. Community transition plans should be evidence-based with a focus on responsive relationships, coordination, and continuity between environments. The transition period is viewed as a reciprocal process for all partners, rather than an event that happens to a child; acknowledging "ready" children, "ready" schools, and "ready" communities (Pianta, Rimm-Kauffman and Cox, 1999; Dockett and Perry, 2001).

Whether transitioning families into or out of GSRP, connections are purposefully created as resources for children: family-school connections, child-school connections, peer connections, and community connections. It is the responsibility of the local GSRP Advisory Committee to identify a transition coordinator who will facilitate regular implementation meetings to generate ideas for carrying out transition activities, create a timeline, and evaluate and revise the local transition plan as needed. The plan features activities that support children and their families as they move into prekindergarten and from prekindergarten into kindergarten. The plan should differentiate between "orientation to school" and "transition to

school," and respect the different perspectives and expectations of families and children.

Transition Into Gsrp

Children enter GSRP having experienced varying services and environments: home, *Early On*, or possibly another early education child care setting. Key to transition is establishing frequent, open, and honest communication between program staff and family members. Successful strategies for establishing positive communication begin with staff eliciting, valuing, and using information from parents about the enrolled child.

Parents, like children, come to GSRP with different circumstances and experiences. Programs should develop strategies to communicate with all parents. Some parents may work two jobs or a night shift, cannot read or speak English, share custody of a child, and/or have had poor school experiences themselves. Meaningful information and opportunities should be provided to parents based on their expressed interests and needs. Refer to the Parent Involvement section for more information.

Before school begins, an initial home visit and an orientation opportunity for the child and parent help staff and families begin to get to know each other and build trust. This continues throughout the year as formal and informal occasions are utilized to strengthen responsive relationships between all involved. This includes drop off/pick up times, email, notes or phone calls, family events, home visits, and parent/teacher conferences.

Written information should be positive and useful. The parent handbook should include a program overview, school calendar, contact information; and policies regarding attendance, weather, illness, medication, conflict-resolution, emergencies, confidentiality, and grievances. It should also be written in a manner that is understood by parents.

A high-quality GSRP employs many strategies to engage parents as decision-makers in all facets of the program. Staff begin this during the very first contact by asking parents what information they would like to know about the program. A one-page explanation of the role of the local GSRP Advisory Committee, how often it meets, the support available to parents who serve, and the work typically done, might help parents to feel comfortable who would otherwise think special skills are required for participation. For confident and active participation, Advisory Committee work should begin with an orientation on topics such as membership, organizational structure and responsibility.

Transition Into Kindergarten From Gsrp

GSRP is key to the development of plans that ease the transition of children and families from prekindergarten to kindergarten. Kindergarten transition activities with children should include casual discussions about the differences between

Section: Transition GSRP Implementation Manual Revised November 2012 prekindergarten and kindergarten, reading of books about going to kindergarten, and possibly taking a fieldtrip to a kindergarten classroom with children and parents. Another option is to have a kindergarten teacher visit the GSRP classroom, assist in a large group activity by sharing a book or a song and relating it to books or songs that may be similar to what children will experience in the kindergarten classroom. Teachers could make a photo album of the classroom, kindergarten teachers, principal, other staff, and other rooms that may be a new part of their school experience (such as the music room).

Staff may plan to assist the transition of parents by connecting with other families who have already made the transition from GSRP to kindergarten, in the format of a panel discussion with past parents. They can also support families to create a visual record of the ending celebration of GSRP and provide pictures to each family.

Kindergarten transition activities for GSRP staff may include participation on the local GSRP Advisory transition committee or being a part of an Individual Education Program Team as a child transitions into kindergarten. GSRP teaching teams may meet with the receiving kindergarten teachers individually or in a regional event where the focus is data sharing to discuss developmental profiles. GSRP staff members are responsible for reviewing children's records to determine what information will be copied and forwarded once a request for records is received. All teaching teams will utilize the final home visit to individualize transitioning for a child and family. This may include supporting a parent in the first few months of kindergarten. Staff may provide families a summer activity guide/calendar that includes information about what the kindergarten experience will be like. A series of tip sheets on transitioning into kindergarten can be found at: http://www.michigan.gov/mde/0,1607,7-140-6530 6809-152726--,00.html.

Two Year Kindergarten Sequence: Retention Kindergarten

GSRP exists to ensure enrolled children have a successful transition into and experience in kindergarten. Children are entitled to kindergarten when they are five on or before the date set by the Michigan Legislature. Kindergarten is designed to be a one-school-year program before first grade. There is no "grade" in Michigan entitled Developmental Kindergarten, Begindergarten, or Young 5s, etc.

When staff and families begin the transition process into kindergarten, a parent meeting should take place to sum up the year, discuss transition, and address the aggregate results of the ongoing child assessment tool used in the program. This leads into an opportunity to discuss horizontal alignment within the GSRP and vertical alignment between GSRP and kindergarten. For more information on alignment see the Center-Based Curriculum section.

Additional discussion should include the research history showing that delay of school entry, placement in extra-year programs, and retention are generally detrimental to a child's overall school success. Parents should be objectively informed regarding their rights when enrolling children into kindergarten. A position statement on this issue developed by the National Association of Early
